Detailed Inventory

PWS Name: City of Ranger
PWSID: TX0670004

Purpose of this worksheet: *To provide a format water systems can use to track materials for each service line in the distribution system.*

General Instructions: *Each row in this worksheet represents one service line connecting the water main to the customer's plumbing. The worksheet includes required and recommended elements; the columns with the aqua shading are required by the LCRR. The worksheet includes examples in rows 12 - 20 and is formatted for approximately 10,000 entries.*

Note: Cells that have a superscript [1] are required fields; Cells that have a superscript [2] are conditionally required fields; and are impact formulas that without document

A Unique ID is recommended for each service line.	*Water systems must track addresses of all service lines in their internal inventory. For the publicly accessible version, location identifiers are required for lead and galvanized requiring replacement. If the system does not use addresses for their location identifier, other options could include a landmark, intersection, block, or other details to specify service line locations. If using GPS coordinates, utilize the GPS Coordinate - Latitude/Longitude fields and include 5 decimal places.*							*Dropdown list includes recommended subclassifications.
